

Dear Dr. Friedman,

I am writing to notify you that FDA's proposed rulemaking on structure/function claims, 21 CFR Part 101/
Docket #98N-0044, is totally unacceptable to me as an American consumer of dietary supplements. Any final
rule must reflect the true meaning and intent, mandated by Congress, of the Dietary and Supplement Health
and Education Act (DSHEA). *It is not in citizen's best interests!*

I support FDA's effort to fully implement DSHEA as intended by Congress, however I strongly object to the pro-
posed regulations which: *This is to create a roadblock to our*

- * *prevention and cure of disease without pharmaceuticals*
1. limit my access to (scientific) information about dietary supplements and health, and
- * 2. redefine disease restricting my ability to focus on preventive care and wellness.

It is extremely important to preserve Section 6 of DSHEA to allow for a robust flow of valuable health information
in the marketplace.

I want free access to available information about dietary supplements and health, and I want FDA to withdraw
its proposal to redefine disease in a way that limits such health information.

DSHEA allows products to make structure/function claims on the product labels. Redefining disease to nullify
that part of DSHEA must be withdrawn. *This is ludicrous.*

Sincerely,

Sign your name
